

# We can be wherever you are... in print or electronic format.

I read the paper online now that I'm serving our country... it keeps me in touch with my home.

My husband and I share the newspaper. I like being able to point out stories that we're both interested in.

This online subscription to my local newspaper lets me show all my new college friends where I come from.

There's nothing better than a cup of coffee and the newspaper. It's how I start my day.

After I retired and moved away, I found I could keep up with my hometown by reading the online newspaper.

I prefer to read my newspaper in print. There's something about the way it feels in my hands...

If you're tired of waiting for your newspaper to be delivered, subscribe to our new electronic edition.

All you need is a computer, Internet connection and credit card to get started. It's the perfect way for military personnel, retirees, college students and others to keep in touch with their hometown.

When you log on, you'll view an exact replica of the print version – in PDF format. You can read the paper online, download it to your computer or print it out. Also, the PDFs are searchable.

With our electronic edition, you can read the paper wherever there's an Internet connection – at home, at work, on vacation or at school.

Of course, we still offer the print version and if you're willing to wait on delivery, we're still willing to send it to you. But if you want to receive your news in a timely manner, take a look at the electronic edition. We think you'll like it.

It's just another way we're working to make your life better.
